

## INTEGRATE SKILLS AS NEW MODEL FOR WORK ADDRESSING THE MARKET CHANGES AND NEW CUSTOMER NEEDS

Dear Professional,

In the economic difficulties of the European economic market, we decided to share together with you, a new model of work, that allows, in partnership, to meet the challenge of the future and have a new range of services and opportunities for the customer, even the discerning one.

Project Studio is happy to offer now also to you as exclusive partners, at competitive prices and in line with the market, the skills and expertise gained in the design and test plant generally, and advanced plant, in the fields; electrical, electronic (home automation and alarm signal), mechanical and thermal from over twenty-five years.

Always, Project Studio, keep in touch with technological progress, is equipped with the most advanced in-house technological solutions and of the related ratings, such as for example; systems and instrumentation verification of electrical, thermal and mechanical functionality and compliance with Standards (including international), certification in the energy field with professional radiometric instrumentation, professional infrared cameras (from 2007) and supporting certification systems for the detection and assessment of pollution for frequency from 0 to 6Ghz (from 2009), systems design platform Autodesk (since 1989) and the new concept of BIM (from 2005), the prototyping systems with CAM machinery (since '2007), the professional 3D printing systems ABS (from 2011), and its 3D modeling software (autocad inventor).

Attentive to security matter in general, and specifically, with qualifications such as "Coordinator security "and" Coordinator for the execution of works ", we also remain committed within Fire, with qualification of "Professional Fire" and energy saving which "Energy Certification".

Upon completion of the works carried out the Project Studio is equipped with the latest data printing solutions, including solutions for digital imaging of printing with different mediums, laser cutting and modeling components of presentations polycarbonate, nonferrous metal and material organic with CAM machinery (3axes).

The innovations that drive us, however, to tell our story and our services, in addition to those already existing for some time, however, are absolutely revolutionary.

So here it is;

– Since 2014 Project Studio is equipped with an modern photo-film UAVs (Unmanned Aerial Vehicle) commonly called drone, with resilience FullHD for video and up to 14 Megapixel for photos, all with qualified pilot. ( example movies on : <https://youtu.be/58ZSVoKlnTo>  
<https://youtu.be/ZbJNXY91Dcw> )

– Since 2014 the firm has acquired the instrumentation software and expertise certified for detecting and processing of point clouds with a resolution of (+/- 1mm @ 330 meters) with solution FARO X330 and SCENE software ( example movies on <https://youtu.be/HLxafxYd8is> ) for Architecture, plant, MEP systems and forensic

Through these latest cutting-edge technology we can perform measurements and geo clouds points, raw or processed according to the needs of the customer, the most common interchange formats, or we can prepare elaborate specific with ortho-photos and measurements displayed. Naturally the same remarks can be performed in the interior, both for the three-dimensional photographic documentation of the property or installations, is processed to produce relief exact and sections of plants for further processing also for other technicians such as Surveyors and Architects

These services and informations are always parts included in our workflow integrated design.

We are therefore ready to cooperate, to provide our technical expertise to integrate what you needs if necessary, and assist you in your everyday professional or extraordinary need, whether it's accurate and specific advice or a whole project that we develop on your behalf or for your client.

Whether it is therefore a simple advice on work just done or to be done, on a test or an integration of design documentation supplied with a plant, or a project documentation for obtaining permits or concessions renewals in plant as well as on the drafting of a complete plant project, also advanced, we are here, at your disposal.

So please feel free to contact us for any clarification and additional information.

The  Project Studio Team
